HTML - Heading elements   h1, h2, h3, h4, h5 and h6.

The W3C HTML5 specification describes six HTML heading elements: h1, h2, h3, h4, h5 and h6 . ref

The height of a heading element is specified in the browser's default stylesheet. See col 4 below. ref

The height of 1 em is usually 16 pixels.

The em is a unit of measure from the field of printed type, and is equal to the width of the letter M.   ref

HTML element	rank	example text	default stylesheet	pixel height
**\ \ **	1	h1	font-size: 2em font-weight: bolder	32 px
**\ \ **	2	h2	font-size: 1.5em font-weight: bolder	24 px
**\ \ **	3	h3	font-size: 1.17em font-weight: bolder	18.72 px
**\ \ **	4	h4	font-size: 1em font-weight: bolder	16 px
**\ \ **	5	h5	font-size: .83em font-weight: bolder	13.28 px
**\ \ **	6	h6	font-size: .67em font-weight: bolder	10.72 px

h1 = 2em/32px   h2 = 1.5em/24px   h3 = 1.17em/18.72px   h4 = 1em/16px   h5 = 0.83em/13.28px

h6 = 0.67em/10.72px

Normal text height is 1em / 16px.
